

Karara Mining Limited

Introduction to Scope of Work P2-921

Corrosion Remedial Services

This Statement of Work (SOW) is structured into five distinct sections to define the scope, responsibilities, deliverables, and procurement strategy:

1. Anti-Corrosion Treatment Service – Building 1310 Cleaner Magnetic Separator

Scope includes inspection, scaffolding, cleaning and surface preparation, treatment, and application of anti-corrosion measures in compliance with specifications. The Cleaner Magnetic Separator will be executed on a fixed-price basis, while other site structural steel corrosion treatment works on 'as required' basis will be undertaken on a schedule of rates.

2. Anti-Corrosion Treatment Service – Building 1314 Concentrate Filtration

Scope includes inspection, scaffolding, cleaning and surface preparation, treatment, and application of anti-corrosion measures in compliance with specifications. The Concentrate Filtration will be executed on a fixed-price basis.

3. Anti-Corrosion Treatment Service – Building 1305 Rougher Magnetic Separator

Scope includes inspection, scaffolding, cleaning and surface preparation, treatment, and application of anti-corrosion measures in compliance with specifications. The Rougher Magnetic Separator will be executed on a fixed-price basis.

4. Anti-Corrosion Treatment Service – Building 1318 Tailings Filtration

Scope includes inspection, scaffolding, cleaning and surface preparation, treatment, and application of anti-corrosion measures in compliance with specifications. The Tailings Filtration will be executed on a fixed-price basis.

5. Scaffolding Services – Site Wide

Scope includes the supply, erection, and dismantling of scaffolding for all required works on an 'as required' basis under Schedule of rates, together with confined space management in compliance with safety regulations.

6. High Pressure Washing and Poly Coating Services – Tanks, Site Wide

Scope includes high-pressure surface cleaning, preparation, repair of rubber linings, and application of protective coatings to ensure durability and compliance with specifications on an 'as required' basis under Schedule of rates.
